

Why do so many refineries choose PetroSkills solutions for workforce competency?

Entry Level Training

PetroSkills offers best practice curriculum for entry level training.

Operational Safety

PetroSkills effective competency assurance programs mitigate risk.

Operational Excellence

Leverage PetroSkills experience and our blended and site specific approach to learning.

PetroSkills can help you develop a complete workforce competency solution to:

Identify and bridge knowledge gaps in your workforce and develop an enterprise-wide training standard with attention to site-specific requirements

Automate enterprise-specific standards and compliance mandates to meet regulatory requirements

Accelerate time to competency for engineers, technicians, operators and craftspeople at every level of their career

Assure competency through industry-standard competency frameworks, customized for technical job roles within all areas of refining

Our competency development expertise spans engineering, operations and maintenance from entry-level to site/process-specific. Whether our clients are planning an enterprise-wide competency initiative, or a single training program rollout, from instructor-led courses to a blended learning approach combining classroom with online training and technical coaching, we help them with a solution scaled to meet their objectives. Our solutions for refining companies include:

Experience

With over 40 million course-hours of training delivered at over 500 sites worldwide our ePilot™ e-learning libraries represent the gold standard for training and development in the oil and gas industry.

Effectiveness

Developed to exacting Instructional Design standards, learning content is geared toward adult learners and is presented using interactive charts, engaging 3D animations, videos, and easy-to-understand graphics.

Content Relevance

More than 1400 hours of content developed exclusively for the oil and gas industry.

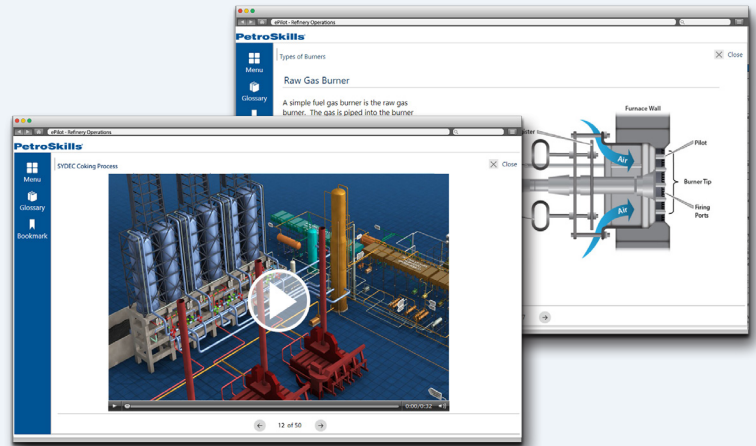

Customization

Content can be customized to meet site, unit, and job-specific needs.

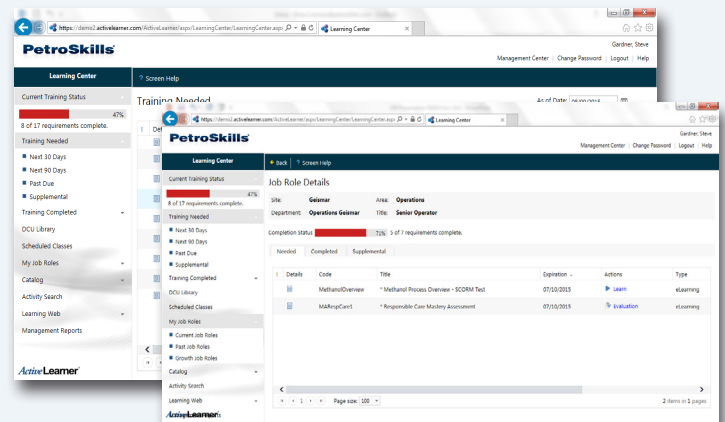

Since our founding over 50 years ago, PetroSkills has been focused on consistent, high quality learning and development for the oil and gas industry. We've grown to a global company with a full spectrum of comprehensive learning solutions, industry-validated competency frameworks, and workforce development expertise.

Topics include:

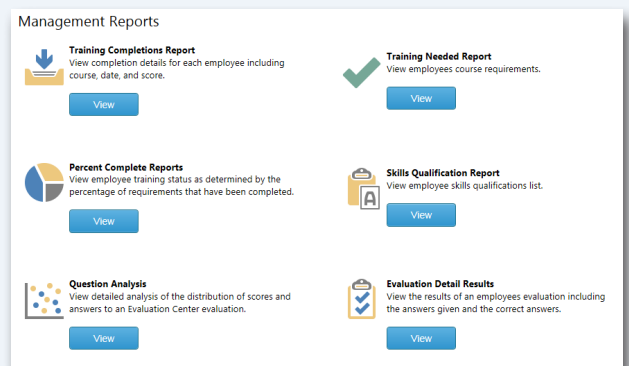

- | | |
|----------------------------|------------------------------|
| Alkylation | Process Hazards |
| Coker | Process Safety |
| Core Competencies | Refinery Overview |
| Crude Unit / Vacuum | Reformer/Isomerization |
| Fluidic Catalytic Cracking | Solvent Deasphalting |
| Gasoline Blending | Sulfur Recovery and Tail Gas |
| Hydrotreater | Turnaround Planning |
| Lube Oil Process | |

ePilot™ gives employees anytime/anywhere access to secure, e-learning programs designed specifically for the oil and gas industry.

Active Learner® provides one system to store and access courses, evaluations, documents, records, manuals and procedures.

Streamlined learning management administration allows you to manage and report on classroom training, e-learning initiatives and identify skills gaps and competency, at a glance.
